

Adams Super Center for Brain Studies
Tel Aviv University

Mini-Symposium

Neurodevelopmental, neuropsychiatric and neurodegenerative diseases: the microtubule connection

2.11.14, 2014, 9:00-12:45- Room 201, Sackler Faculty of Medicine

Chair: Professor Illana Gozes (Tel Aviv University)

9:00-9:15 – get together and coffee/tea

9:15-9:45 – **Professor Peter Baas** (Drexel, USA)

“Microtubule-based therapies for injury and disease of the nervous system: the kindest cut”

9:45-10:15 – **Professor Illana Gozes** (Tel Aviv University)

“Activity-dependent neuroprotective protein/NAP: microtubules, autophagy and news about autism”

10:15 -10:45 – **Professor Orly Reiner** (Weizmann Institute)

“Regulation of radial migration in the developing brain: a matter of health”

11:45-11:15 – Coffee Break

11:15-11:45 – **Dr. Anat Bar-Gil** (Tel Aviv University)

“Evidence for Notch1 and Delta like 1 segregation during trafficking”

11:45-12:15 – **Professor Micha Spira** (Hebrew University)

“Microtubule stabilizing reagents counteract the development of tau-Induce hallmark cell pathologies”

12:15-12:45 – **Dr. Eran Perlson** (Tel Aviv University)

“Location, Location, Location-Amyotrophic Lateral Sclerosis as a spatiotemporal mislocalization disease”
